

Your Tests. Our Compounds. Better Outcomes.

**Custom Compounded Topicals
for Mobile Wound Care**

From Lab Results to Targeted Action

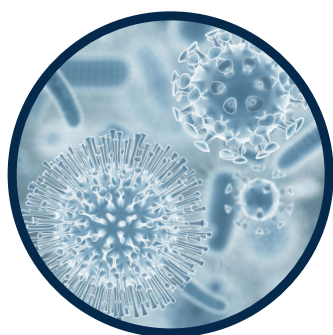

Payers increasingly expect that lab results directly inform treatment decisions. When results don't lead to action, medical necessity can be questioned—and reimbursement may be at risk.

Close the Loop with Custom Therapy

Massey Drugs transforms your PCR/DNA reports into tailored topical treatment plans precisely matched to the organisms identified.

This Approach Helps Your Practice:

- Clearly demonstrate data-driven treatment decisions tied to lab findings
- Strengthen compliance and reduce payer recoupment risk
- Improve patient outcomes and adherence with individualized therapy

Partner with Us

Let's make wound care more effective and seamless for your patients.
